Figure 3: Screenshot of the meeting log from Sprint Planning

During the Sprint Planning we decided that for this Sprint we will focus mainly on writing the report. This Sprint we also decided to refactor certain parts of the code as you can see in the screenshot of the backlog. The screenshots were unfortunately taken 2 days into the Sprint, therefore some of the tasks were already done or waiting for review at that time. After talking to our teacher we also planned a meeting to create all of the important diagrams we will use in the report.

During this sprint we decided to keep the story point system from the last sprint. We used a 10 points scale, which represents the sum of difficulty and importance of a task, both on a scale of 1 – 5.

During the Sprint Planning, for the refactoring tasks, we split into two teams of three. The teammates with more aligned schedules were paired together. Tasks regarding report writing were split individually, except for one shared chapter which is Implementation.

- Sprint Review and Retrospective

Due to starting this Sprint later than originally planned, we decided to move the end of the Sprint to the 17th of May, therefore we didn't have the Sprint Review and Retrospective yet, the Sprint Review is going to be held on 16th of May.

- Graphs

Unfortunately, since the Sprint is still in progress the graphs that Jira provides would be inapplicable. Instead, on the next page is a screenshot of our Jira board, to show our progress so far.
